

# MAKE A DIFFERENCE CHOOSE RECYCLED

Introducing **Harbor100**, a multipurpose office paper with unmatched environmental qualities and proven performance.

Grays Harbor Paper, Hemlock Printers and Frogfile Office Essentials have partnered to make this affordable product available to both small and large-volume purchasers.

## Why Harbor100?

- Because it's made from 100% post-consumer FSC certified recycled fibre. No trees have been cut down to produce this paper.
- Because it works. Guaranteed to perform like the leading virgin fibre multipurpose papers on the market.
- Because it's produced by Grays Harbor in nearby Hoquiam, Washington using a chlorine free process and Green-E certified renewable energy.

## Why 100% post-consumer recycled?

- Natural forests of the world are in decline. In 2005, only 1/3 of the world's forests remained undisturbed by direct human activity<sup>1</sup>. Intact natural forests are vital to biodiversity, the carbon-oxygen balance, and climate control<sup>2</sup>.
- Post-consumer fibre saves a significant amount of trees, water and energy. It produces less waste and greenhouse gas emissions compared to virgin fibre.
