

PRINT LIKE YOU MEAN IT

“DISCONTINUED?
PHAH!”

Tracy Clark
SALES REPRESENTATIVE
14 years in the Hemlock family

Nothing stops her on her quest for a happy client.

Tracy and the sales team at Hemlock are always looking for solutions to their clients' problems. Like the time one of our representatives heard about a company that was producing custom greeting cards and wrapping paper in New York. After a long relationship, their printer informed them that the paper they had been using was being discontinued. The company didn't want to change their look, which depended largely on the colour of that paper. Their printer's response was "Too bad". So Hemlock's team stepped in and made a call to a paper manufacturer, convincing them to make a custom line specially for this client. It's not surprising that the company signed up, and to this day remains one of Hemlock's most satisfied clients.

It's this level of detail and dedication that illustrates how Tracy and every other employee at Hemlock, is serious about printing. At Hemlock, **we print like we mean it** – so should you.
