 **Hemlock**
INTEGRITY. INNOVATION. **IN PRINT.**

A new evolution in 100% Recycled Paper.

This new species of paper may forever change the way you see recycled stock — a 100% post-consumer recycled premium uncoated sheet that gives you clean, bright printing with a green pedigree unmatched in its environment.

In partnership with Neenah Paper, and only available at Hemlock Printers, **Coronado® SST 100** is 95 bright and features Neenah's Special Surface Treatment (SST) technology for smooth printing performance. It is also the first paper of its kind certified carbon-neutral throughout its lifecycle, with Hemlock's ZERO Carbon Neutral Print Program and Offsetters.

So, when you specify **Coronado® SST 100**, you help sponsor BC's Great Bear Rainforest Carbon Project which offsets approximately one million tonnes of carbon dioxide emissions from entering the atmosphere annually.

FSC® Certified - Supports well-managed forests as well as the responsible use of forest resources

100% Carbon Neutral - Reducing carbon emissions plus conserving natural resources and wildlife habitat

Offsetters - Hemlock's carbon offset partner meets or exceeds the benchmarks of the Gold Standard for 'real', 'additional' and 'permanent' greenhouse gas reductions

Green-e Certified - Neenah Paper and Hemlock Printers match the electricity used in manufacturing and printing with Green-e certified Renewable Energy Certificates
